SKILLS

JavaScript, Angular, HTML, CSS/SASS, Node.js, Flutter, Bootstrap, RESTful web services, MySQL, Git/GitHub, Material UI, Pug, Full Stack Development

EDUCATION

Master of Science (M.Sc.) in Information Technology

University of Mumbai, GPA 9.40/10

Mumbai, Maharashtra India
2021 - 2022

Bachelor of science in information technology

University of Mumbai, GPA 8.23/10

Mumbai, Maharashtra India
2017 - 2020

STRENGTHS

Self-starter
Proven ability to work independently, manage multiple projects simultaneously leading to timely, accurate results

Cross-functional Teamwork
Experience collaborating with cross-functional teams to develop features across various software projects.

Technical Expertise
Proficient in JavaScript, coded efficient, maintainable web applications that resulted in 30%performance improvement

Problem-Solving
Skilled in creating innovative solutions that enhance project functionality and user experience.

Leadership
Proven track record of leading teams in project development, fostering collaboration and timely delivery.

Responsive Design
Specializing in developing user-friendly interfaces that are compatible with both mobile and desktop platforms.

PROJECTS

Tim Horton's India (Canadian food chain restaurant)
I have successfully developed all the necessary screens for our Server-Side Rendered (SSR) application. In addition, Iimplemented a feedback form for each store across India.
In addition, I have successfully implemented a rollup campaign system that efficiently distributes coupons to thousands of users throughout India, particularly for special occasions or store promotions. This system is designed to engage a large user base, ensuring they receive personalized and timely offers.

Certably solutions
Property rental application for tenant and landlord
- I developed a responsive application that works smoothly on mobile and desktop platforms.
- Within this application, I successfully built a property rental system designed simply for landlords, allowing them to effortlessly rent out their homes. Landlords may rapidly add homes, providing a user-friendly interface for prospective tenants to browse. To make things easier for tenants, the application offers monthly payment choices, eliminating the need for upfront deposits.
- I've implemented the Stripe payment gateway to provide secure preauthorization processing. This allows tenants to readily secure properties while being invoiced on a monthly basis, resulting in a smoother rental experience.
- Additionally, to make things even more convenient for users, I've also included Google Maps for choosing properties.

Jaspur
I successfully developed an affiliate marketing application that enables affiliates to effortlessly add their products using a user-friendly back-office interface. Consumers can seamlessly access these products through the consumer application, fostering a dynamic and engaging market place.
To streamline the product import process, I implemented a Shopify CSV import feature, enabling users to directly import Shopify CSV files into our system. This feature incorporates robust validation mechanisms to ensure accurateand error-free data transfer.
